Appendix E

Operator Precedence and Associativity

The table below shows precedence and associativity for all the C++ operators. In case of doubt, parenthesize.

Operators	Associativity
() [] -> . ++ (postfix) (postfix)	left to right
++ (prefix) (prefix)! ~ sizeof(type) + (unary) - (unary) & (address) * (indirection)	right to left
* / %	left to right
+ -	left to right
<< >>	left to right
< <= > >=	left to right
== !=	left to right
&	left to right
۸	left to right
	left to right
&&	left to right
	left to right
?:	right to left
= += -= *= /= *= >>= <<= &= ^= =	right to left
, (comma operator)	left to right
